Instructions to take care of your Tahitian Pearl Creation "Poema by Orama"

Your pearl is alive...

Some basic precautions should be taken to avoid damage:

- Don't expose your pearl to sudden changes in temperature.
- The nacre of your pearl is sensitive to acid, chlorine, perfume, hair spray, cosmetics and other aggressive chemicals.
- Even the human skin's natural acid mantle can affect your pearl.
- We recommended to polish it gently with a soft cloth and to rinse it with fresh water after your regular shower.
- Your pearl needs light, water and ventilated area. Wear it frequently because she can lose her luster if you keep her in a dark drawer.
- Try to avoid contact with hard metal which may cause abrasions.
